edtech has become more dynamic and diverse in the tools that are available to an educator. A recent Gallup and NewSchools Veret Fund study found that 89% of all students use digital learning tools at least a few times per week. The same study found that 81% of teachers, 88% of principals, and 92% of all administrators see great value in using digital learning tools in the classoom [1].

In 2018, PricewaterhouSeopers released a survey that focused on technology in US schools. The results indicated that many teachers in the US do not have adequate training or experiences using technology in the most effective ways. More speedling, only 10% of K12 teachers feel confident incorporating highervel technology into student learning [2].

Foothill College Credit Program Narrative Certificate of Achievement in Emerging Educational Technology Leadership

Item 1. Program Goals and Objectives

The Certificate of Achievemeint Emerging Educational Technology Leadership is designed for experienced educators, trainers, facilitators, school leaders, educational consultants, and educator coaches. This program will expand the capacity for teacher leadership through parsies to learning, focused in emerging technologies. Participants will analyze and apply research in teacher leadership, current educational trends, and certifice technological advancements. Skills learned include identifying highuality technologies to integrainer instruction,

Prerequisite skills in instructional design and use of common educational technologies are highly

Year 1, Fall = 58 units Year 1, Winter = 58 units Year 1, Spring -5-8 units TOTAL UNITS: 18

Item 4. Master Planning

Foothill CollegeÖssission is to offer equitable programs and services that empower students to achieve their goals and become productive citizens. By offering a Certificate of Achievement in Emerging Educational Technology Leadeps Foothill will provide an invaluable opportunity for educators, coordinators, and instructors at all levelsticularly those who come from underrepresented minority backgrounds well as edtech entrepreneurs, to establish themselves as current leasts in education technology. These leaders would be empowered to provide culturally responsive instruction and leadership in their organizations. By modeling best practices in education technologies, students in the program will experience opportunities to deepen their understanding of the way emerging trends and cutting edge technologies can be used in the classroom to enhancerington and improve engagement.

Education is an industry that has steadily become more reliant on technology over the decades, with the tools available to educators becoming increasingly more dynamic and diverse. A recent Gallup and NewSchools Venture Fund study found that 89% of all students use digital learning tools at least a few times per week. The same study found that fate the same study found that fate to be principals, and 92% of all administrators see great value in using digital learning tools in the classroom [1].

In 2018, PricewaterhouseCooperteased a survey that focused on technology in US schools. The results indicated that mateachers in the US do not have adequate training or experiences using technology in the most effective ways. More specifically, only 10% 12 teachers feel confident incorporating higher vel technology into student learning [2].

Most recently, in the summer of 2020, Digital Promise and Google for Education released a report focusing on the value of Edtech Coaches in the classroom, particularly during the shift to distance learning due to COVID9. These indings indicated that Edtecho Coches played key role as their districts and schools moved to online learning. There is rity (77%) of all Edtech Co

Technology

Democratic societies [1]. Book and Hispanic workers are underrepresented in the STEAM workforce with Black workers representing 9% of the STEAM korce and Hispanic workers makingup only 7% while combined hey make up 27% of the total workforce [2]. There is a systemic need for programs to provide underrepresented minority educators with an opportunity to become leaders in STEAM education. This certificate will enable educators, coordianadors instructors, particularly those of color, to establish themselves as thought leaders in STEAM education and engage in culturally response within this field.

In 2018, a report released by the Society **foll** in and University Planning ated the importance of community colleges in tackling workforce development in STEAM, particularly focusing on the California Community College System. If coordinated properly, the CCCS could alleviate the problem and develop programs that diversify and grow the STEAM **brove** [3]. Upon completion of the TEAM Instructional Leadership of gram, students will be able to provide high quality STEAM instruction, as well **brigh** quality workshops and webinars on best practices of STEAM instruction.

Item 5. Enrollment and Completer Projections

In the first year, there are projected to **3***be* studets who complete the certificate. After the first year, there will be two cohorts of 30 students. After five years, approximately 270 students will have completed the program. This projection is based on data from student participation in the Krause Center Innovation Õs FAME and EMPower perdigrams over the past decade.
