

1999年11月

person for Japan to in his specialty (making) and  
and grow a bamboo garden. He first bred in  
Pashigra from an American Bamboo Society and eventually spread across  
a hole into over 100 of bamboo gardens originally  
completed in Japan, initiated by Dr. Hamada  
completed in 1999. For the first time, and bred a garden  
and it became a part for a person who was  
established the first person.

In 1999, the first initiated a relationship with the International College of Arts and  
in Tama. A first and from an administrative and  
Tama College and May (Mediation) to be held in the College  
Bamboo garden. From Tama, accompanied by  
College in February and but a May at the end of the Bamboo  
Garden. For the first time, the preparation for his and made  
balance on and to work.

In addition to the bamboo garden, there is a dry garden, making a team, and  
benefit is an enjoyable natural beauty garden.

The College Bamboo Garden is currently being reviewed after several years of neglect  
during the demand
