

The Resources & Revenue (R&R) Committee needs to determine a process to discuss and evaluate college planning documents, such as the Facilities Master Plan, Tech Plan, and the Sustainability Plan. Recommendations from these processes will be made to the President and other shared governance committees. In the previous governance structure, the responsibility for planning resided in separate committees that were formed by shared governance representation, which included appropriate key positions (e.g. Facilities Director serving on the Facilities Master Plan committee) s appointees.
