

	LINC 67	Designing Web-Based Learning Projects	2	Year 1, Spring
--	---------	---------------------------------------	---	----------------

TOTAL UNITS: # of units

Update the list, below, to identify the number of units the student will likely take each quarter (program courses only).

Proposed Sequence:

Year 1, Fall = 5 units

Year 1, Winter = 5 units

Year 1, Spring = 5 units

TOTAL UNITS: 23

Item 4. Master Planning

How does the program align with the Foothill College Mission Statement? How does the program fit the curriculum and master planning of Foothill College, as well as higher education in California?

Foothill's mission is to offer equitable programs and services that empower students to achieve their goals and become productive global citizens. By offering an Online and Blended Instruction Certificate, Foothill will provide an invaluable service to current and future educators and trainers by teaching them to create high quality learning programs in a virtual environment, with a focus on access and equity. By modeling best practices in online education students in the program will experience a real-life example of successful online learning, and they will be able to apply these skills to their own online learning projects.

How many students are projected to complete the program after the initial year? After five years? List and explain the projections.

During its initial year, one cohort of 30 students is projected to complete the program. After the first year, the program will increase its cohort size to 50 students. The intention is to conduct two cohorts of 50 students per year, or 100 students per year. After five years, approximately 400 students are projected to complete the program (accounting for attrition). Events related to
