4. The student must have completed the prerequisite course with a grade of C- or better.

5. The student must have completed the prerequisite course with a grade of C- or better.

6. The student must have completed the prerequisite course with a grade of C- or better.

Aside from Foothill College's ordinary enrollment fees, there are no additional costs to the student to complete this program.

Description

The Associate in Science degree in Plumbing and Pipetting program is designed to prepare students for employment in the plumbing and pipefitting industry.

The program includes the following courses:

PLUM 101: Introduction to Plumbing and Pipefitting

PLUM 102: Plumbing and Pipefitting Theory

PLUM 103: Plumbing and Pipefitting Practice

PLUM 104: Plumbing and Pipefitting Internship

Students will learn how to read blueprints, apply standard methods and installations, and repair both sanitary and waste water systems.

The Associate in Science degree in Plumbing and Pipefitting is a two-year program.

For more information, please contact the program coordinator at (916) 931-1111.

UCC is a community college and does not have a traditional four-year degree program. However, we do offer a two-year Associate in Science degree in Plumbing and Pipefitting.

Our students who pass the final exam will receive a certificate of completion and may contact us for more information.
