Intellectual Property

4186

---

Faculty authors are advised to a) observe all appropriate copyright regulations in the reproduction of materials; b) place their material on reserve in the college library to enable students to carry out the course assignments without being required to buy the material; and c) recuse themselves, whenever possible, from departmental decisions on required course materials when their own texts or media are among those under consideration.

Respective ownership of copyrights by the District and employees is determined by the appropriate collective bargaining agreement and applicable federal and state copyright law.
