

Status of COVID-19 in Santa Clara County

September 2021
Dr. Rebecca Ryan

Good news

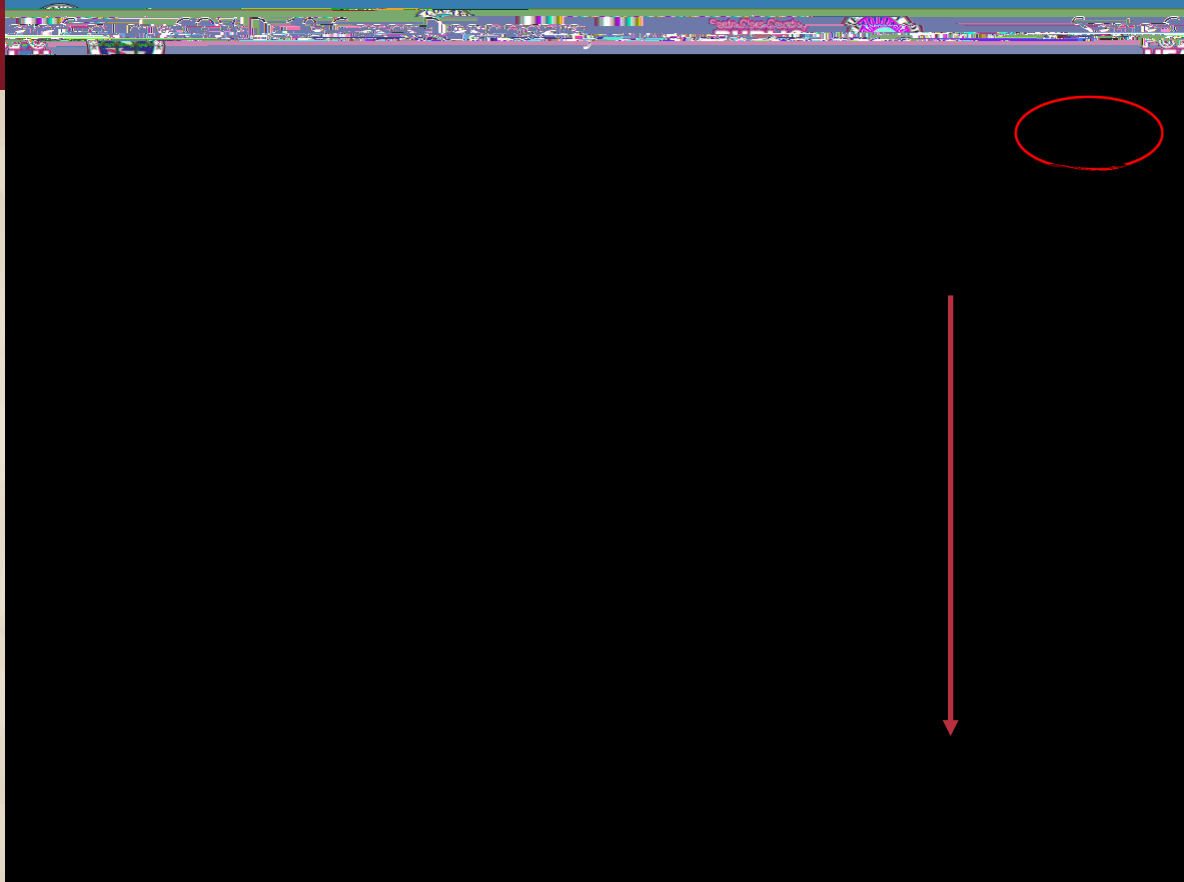

- Current surge: Peak occurred in mid-August; Daily case rates are slowly decreasing
- 7-day average case rates are down by ~150 (per 7 days) in August
- Test positivity rate peaked between Aug 6-16 (0.04) up from low test positivity rate occurring Mid May to end of June (Less than 0.01).
- Hospitalizations have started to decline as of 9/1
- Death rates data after 8/31 have not been published. No decline noted as of 8/31: without Sept. data, conclusions cannot be inferred

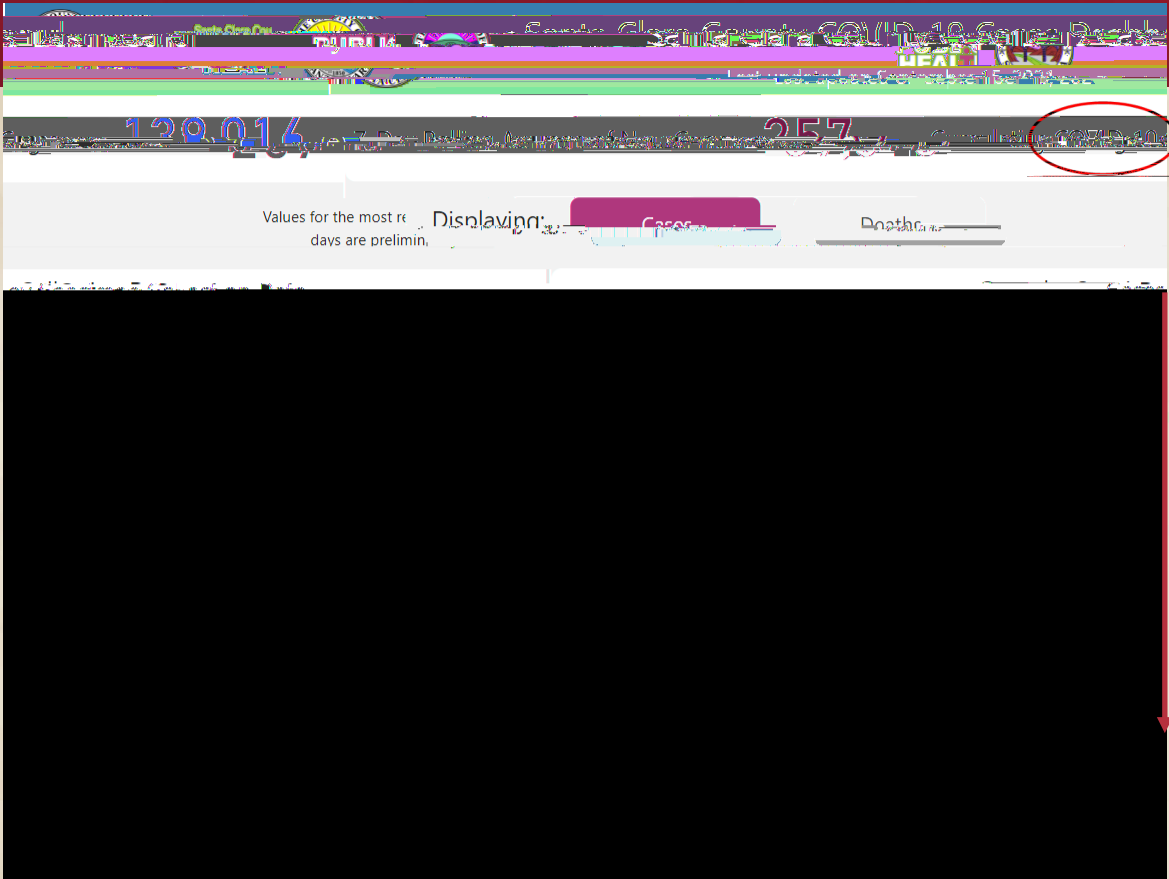

10

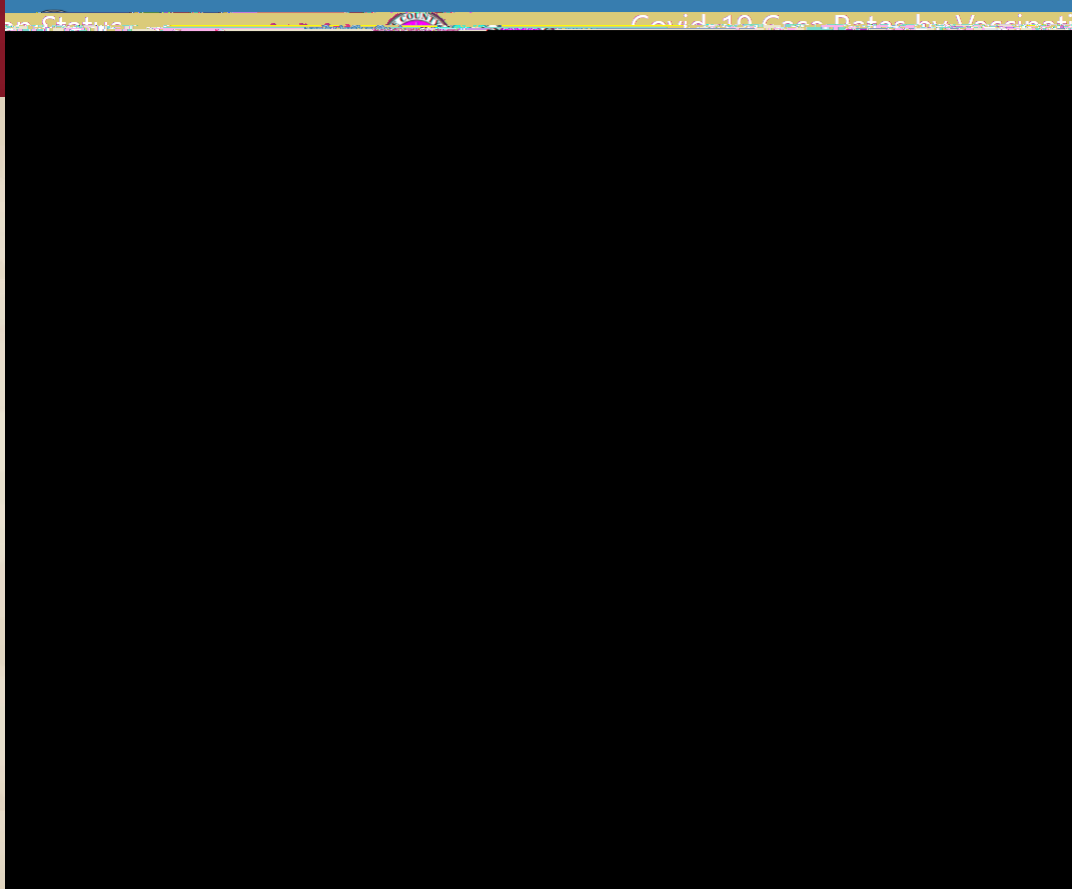

It was...it wasn't the worst of times....(May 30)

And here we are...(Sept 16)

Differentiation by Vaccination Status

Vaccination of SCC *Residents*
