RE: Course Repeats

Overview

All students who are enrolled in a KA course (DANC and PHED) in Spring 2012 were identified and tracked to determine whether they had previously enrolled in the same KA course within the past four academic years (2008-09, 2009-10, 2010-11, 2011-12). Additionally, course enrollment was determined for Fall 2011 and Spring 2012 to provide context to the course repeats. Table 1 shows the KA division courses with the highest enrollment in Fall 2011 and Spring 2012.

Table 1. Foothill College Top 5 Kinesiology and Athletics Courses by Headcount, Fall 2011 and Spring 2012.

Course	Fall 2011	Spring 2012
PHEDF045	469	423
PHEDF47B	147	183
PHEDF024	143	143
PHEDF04	122	138
DANCF04	68	110

Table 2 shows the KA courses with the highest number of course repeaters. Among PHED courses, repeatability occurs more often in PHEDF034H, PHEDF045 and PHEDF060. For example, out of the 423 students currently enrolled in PHEDF045, 129 have taken the same course at least twice before. Among DANC courses, repeatability occurs more often in
