Q19: What do you believe are the strengths of the program? (n=15)
Fantastic instruction.
How it prepares us to find jobs after the program. All the steps.
Preparing us in a well rounded fashion for an entry level tech job.

The 4 rotations prepare you for many different work environments.
Level one trauma affiliates, exposure to advanced modalities.

It's a very comprehensive program that introduces you to many aspects of radiology.

No comment.
The clinical sites and positioning.

Detail that they give you.

None.
More OR training and exposure to trauma.

Definitely just more OR.

None
More clinical hours during the first year.

Concentrate more on real life applications (how to actually fix som.9(p)ip.9(p)ip(re)-1(c)4(l(p)ip.9)N/AuD 82

Make Fluoro class closer to graduation time.
More OR time with the C-Arm and more interactive class participation rad review in class rather th mostly online portion. Overall Foothill is a great program and students are given sufficient time in all areas of the radiology department.

More focus on developing relationships and connecting with people as that is how jobs are received as it's more about who you know than how good you are provided your at least competent. Grades hardly matter when getting a job but working hard, having good enough skills at the job and working well with people do much more and of course making friends, being easy to work with and learning to hang out and have fun with Tech's and Supervisors. Less focus on presentations and non essential assignments that are not used in very day Rad Tech jobs and spend more time getting hands on experience especially towards the end with as little supervision as is legally allowable to help Students transition from always having someone looking over their shoulder approving every image so they can learn to be more independent, self assured and able to trouble shoot and figure solutions out on their own.
Positive reinforcement builds stronger techs, than intimidation.
